

# PHYSICIAN SUPPLEMENTAL RECORD

This form is a medical record template for documenting burn injuries. It features two large, blank line drawings of a human figure, one facing forward and one facing backward, for recording the location and extent of burns. Above the figures is a detailed illustration of a human eye. A legend at the bottom center defines the shading used to indicate the degree of the burn:

- 1° Burn: Represented by a single horizontal line.
- 2° Burn: Represented by a grid of three horizontal lines.
- 3° Burn: Represented by a solid black square.
